Reasons For Allowance

The following is an examiner's statement of reasons for allowance: claims 1 and 13 set forth a spring element that includes a base body with spring arms spaced apart to define a pair of gaps, and a support body with two support arms mounted on the base body and which can be rotated upon the base body such that the support arms are disposed within the gaps. These features are not shown or suggested by the prior art of record. Fromme (6,477,727) shows a spring element that is substantially identical to the claimed base body portion, with a base plate, spring arms, and a bearing disc supported by the spring arms. There is no rotatable support body or equivalent structure disclosed or suggested in this reference. None of the other cited references show or suggest the use of a rotatable support body that can be combined with a base body such as the one shown by the Fromme '727 reference, and as such the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujino, Queiroz, Fromme (5,787,533), Tanaka et al, Ottiger et al, and Hartmann show composite type plastic spring elements used to make bed bottoms and mattresses which are of particular interest in that they show the state of the art.
